Engineered for life on the road

Incredible horizontal and vertical lens offset

Lightweight and simple to use stacking kit

Minimal investment for a full suite of lenses

Christie Digital Systems' Roadster X4 has evolved, already an established and proven system for rental staging applications, this next generation staging projector boasts the most durable and dependable chassis yet. Passing rigorous and extensive 3rd party testing, the new ruggedized Roadster X4 is engineered for life on the road.

A workhorse projector outputting 4,000 ANSI lumens by way of a power saving 700W Xenon CERMAX® illumination system. The X4 delivers unmatched grayscale consistency and color temperature stability in a package that consumes almost 50% less power than its nearest rival, making event-staging projection accessible to even more venues.

Christie Digital's long-standing expertise employing 3-chip DLP™ technology enables you to take full advantage of the Roadster's digital capabilities. Fitted with a digital interface, the Roadster X4 can project a digital signal from source to screen without signal conversion – ensuring a 100% digitally perfect image reproduction every time. Making the Roadster X4 the ideal choice for projecting HDTV and DTV images as they were intended.

In keeping with our edict of offering purpose-built solutions, all models in the Roadster series are fitted with Christie Digital's proprietary Intelligent Lens System (ILS™) and LiteLOC™ facility. The former, a fully motorized lens system allows for the automatic recall of lens position and source parameters upon changing source, not only reducing set-up times but also making it possible to stage more sophisticated events with lower labor costs. While the latter gives you full control of the X4's programmable power supply.

The Roadster series is compatible with the widest range of sources and supported by a complete range of both fixed and zoom lenses (with bayonet-style insertion for fast lens change). And because the Roadster X4 has such tremendous lens offset and electronic keystone, the X4 can accommodate even the most demanding staging environment.

This off-set and keystoneing capability combines well with the systems functional, unobtrusive design and compact size making it the ideal system for stacking solutions. The Roadster X4 can be easily flown via integrated fly-points or via a newly designed stacking rig. The X4's modular structure provides easy access to the X4's internal systems via a quick-release side panel – even when rigged to fly.

The Roadster X4 also shares a common modular architecture with all the other models in the Roadster series. If your projection needs change, your Roadster X4 projection system can change to meet them. The X4 can be upgraded at only an incremental cost and deliver stunning true SXGA resolution images at 6000 ANSI lumens.

Rugged, robust and reliable this 92lbs-workhorse projector takes the stress and strain out of event staging and is engineered for life on the road.

Roadster The World's 1st purpose-built projectors for Rental Staging

Rear view of Roadster X4 showing LCD display panel and inset keypad

- ▶ Upgradeable to higher brightness and / or SXGA resolution
- ▶ Self-stacking
- ▶ Fully motorized lens mount
- ▶ Built-in Light Shutter
- ▶ Variable Lamp Power Supply
- ▶ Auto set-up
- ▶ Consistent image quality
- ▶ Light Output Control
- ▶ Low sound level

- ▶ Xenon illumination system
- ▶ Full HDTV and DTV compatibility
- ▶ Widest source compatibility, covering resolutions from VGA to VGX and HDTV
- ▶ Dynamic scaling
- ▶ Auto lock-in
- ▶ Universal AC voltage operation
- ▶ Optional lens suite
- ▶ 4000 ANSI lumens maximum
- ▶ ILS™ Intelligent Lens System
